

The BTB Auto Glass & Body Shop Removal System

BTB's versatile, precise, efficient and user friendly system safely removes any adhesive bonded auto glasses, body panels or decorative mouldings without damage to component or painted panel while avoiding operator injury. This small, compact and powerful air tool operates blades to cut with precision from inside or outside of the vehicle, against the glass surface, or in the case of an encapsulated glass, the blades will safely cut away from the encapsulation and against the pinchweld or body panel.

Nylon control head & adjustable arms regulate cutting depth of all blades

PATENTED DESIGN

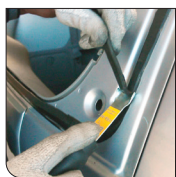

The short & fast in-line stroke of the BTB air tool gives unequalled, gentle & balanced cutting action

Registered and Pending Patents and/or Designs Extending Worldwide.

AUTO GLASS REMOVAL

BTB Long blades easily cut urethane below any dashboard.

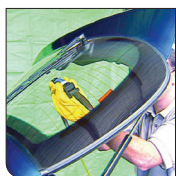

Remove excess adhesive easily and safely.

Cut from outside the vehicle with BTB's Powered Cold Knife blades.

Short blades cut from inside the vehicle with precise depth control.

For curved glasses, thin flexible blades follow the contour of the glass.

Excellent for removal of small and encapsulated glasses.

Save and reuse any undamaged glass or encapsulated glasses.

BODY PANEL & BADGE REMOVAL

Powerful tool & strong blades cut tough adhesive to remove bonded body panels.

Recycle adhesive & tape fitted badges, mouldings & bump strips.

BUS, TRAIN & COMMERCIAL VEHICLE

Cut from inside or outside to reduce effort and removal times for large glasses.

Special blades remove backfill adhesive between glass edges and / or panels.

Safely remove adhesive bonded panels from buses and trains.

The BTB System range includes our **AIR-TOOL** 12V **E-TOOL** plus an array of General-Purpose and Application-Specific **blades** sold separately or in **kits**.

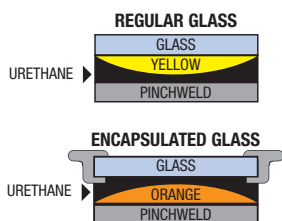

The full range and further details are available in the BTB Removal System catalogue or online at btbtools.com

BTB Blades Explained

BLADE COLOUR CODING

Yellow Blades are designed to cut with the flat side of the blade hugging the glass surface.

Orange reverse blades are designed to cut with the flat side of the blade hugging the pinchweld and saving encapsulated glasses.

CUTTING BELOW DASHBOARD & HARD TO REACH AREAS

Long **Straight Blades** easily reach hard and wide adhesive on any vehicle make or model.

CUTTING FROM INSIDE VEHICLES

Short **Z Blades** are used for precise cutting along top / sides of glasses and easily accessible adhesive areas. Use **Orange** blades for encapsulated glass removal.

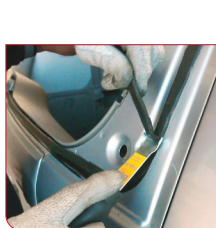

CUTTING FROM OUTSIDE VEHICLES

Powered Cold Knife Blades allow easy removal of glasses from outside the vehicle. They are safer and easier than manual cold / pull knives.

CURVED / CONTOURED GLASS REMOVAL

Flexible Blades cut while following the contour of curved glasses.

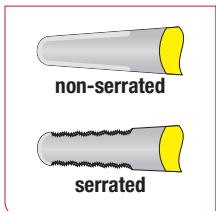

ENCAPSULATED GLASS REMOVAL

Orange Reverse Blades hug the pinchweld to remove and save undamaged encapsulated glasses for reuse.

PINCHWELD TRIMMING

WK6 winged non-scratch **Pinchweld Scraper Blades** allow easy and safe removal of excess adhesive. These are uniquely sharpened with a special wing on each side which leaves 1 to 2mm thickness of adhesive for re-bonding and eliminates damage to paintwork and vertical pinchweld walls.

SERRATED vs NON-SERRATED

Standard **Non-Serrated** blades can be used in all glass and panel applications. Special **Serrated** blades provide a faster more aggressive cut for glass removal by more proficient users.

CUTTING DEPTH CONTROL

BTB's fully adjustable cutting depth control arms ensure precise cutting depth to avoid contacting painted panels.
