Skinning Pliers

NEW

426801 Door Skinning Pliers Narrow Head

✳ These narrow head pliers make it possible to remove the edging from car door skins to repair inner panels. The first active jaw progressively lifts the door skin/flange allowing access for the wider jaw pliers.

NEW

426800 Door Skinning Pliers Wide Head

✳ The wide head pliers peel back the flange lip to right angles to allow access to repair the inner framework.
✳ Great for restoration work and repairing panel damage around the edge of doors, bonnets/boots and other panels
